

**EUFAR Webinars thematic group:
The European landscape of airborne infrastructure and future
28 March 2025, 14:00-19:00 (CET; Warsaw-Paris time zone)**

Registration to the EASW #9 webinar:

<https://www.eufar.net/event/registration/the-european-landscape-of-airborne-infrastructure-and-future-4032>

This webinar aims to screen the landscape of airborne infrastructures in Europe. The infrastructures which will be presented are reflecting on the creation of a European central access to airborne platforms and associated virtual observatory: the AIRLIFTS initiative. The AIRLIFTS initiative is beneficial for the scientific community and will be presented.

This creation is supported by national agencies, which will present the national programmes and strategies. The partnership with industrial members is explored, to share expertise and to open new flying opportunities.

This webinar will give an overview of the collaboration potential within Europe and internationally, as well as an overview of the future of airborne research and structure.

It will be emphasized the operational capabilities, expertise, national contexts and future development within the AIRLIFTS initiative.
