

This document shows where articles describing EUFAR activity can be found on the EUFAR AISBL website and provides an optimal article structure template to be sent to the EUFAR Office bureau@eufar.net for publication on the EUFAR website service.

**1. Article presentation on the EUFAR AISBL website**

**Home page** (<https://www.eufar.net>)

There are two windows with an article announcement on the EUFAR AISBL website Home page. The articles are presented in the News category and Airborne Research Stories category windows depending on article categorisation. All articles shown are in the same standardised form and contain the following elements: article title, excerpt and an illustrating picture. *Figure 1* and *Figure 2* presented below show how the **News** and **Airborne Research Stories** windows are displayed on the EUFAR website Home page. All article elements necessary for publishing are thoroughly defined hereafter.

*Figure 1: News window*

*Figure 2: Airborne Research Stories window*

## Article dedicated page

Articles announced on the EUFAR AISBL website Home page can be opened on a separate, dedicated page. Any user can click on a link attached to an article title presented in blue or by clicking the “...” below an excerpt in the News section. The composition of the article essential elements on the dedicated web page is shown in Figure 3.

The screenshot shows a web page for 'AIRBORNE RESEARCH STORIES' with the following elements and annotations:

- Title:** 'The Story of a Research Flight (Video)'
- Authors:** 'By BROWN Phil, CANONICI Jean-Christophe'
- Content:** A detailed text block describing airborne research, including a bulleted list of tasks like 'preparing the scientific justification and funding applications' and 'making detailed flight plans'. It also mentions the SAFIRE aircraft and the MAGIC-Comet campaign.
- Tags:** 'Falcon-20 NAWDEX SAFIRE' and 'WHISPERS 2018 Best Paper Award'

On the right side of the page, there are sections for:

- Entry gallery:** A photo of a SAFIRE Falcon-20 aircraft on a runway at night.
- Related videos:** A video player thumbnail with the EUFAR logo.
- Related entries:** A link to 'French Service of Instrumented Aircraft for Environmental Research (SAFIRE)'
- Recent entries:** A link to 'Contribution of EUFAR AISBL to EGU 2019'

At the bottom right, a blue link reads: 'Related photos, videos, articles, documents'

## 2. *Template*

The article template shows what elements are necessary for a harmonised publication on the EUFAR AISBL website. All details described below should be completed and sent to EUFAR Office (bureau@eufar.net) along with photos, videos, documents, etc. and to be provided as separate files.

---

### **Category**

News or Airborne Research Story (please make a suggestion by choosing one category)

### **Title**

Max 255 characters

### **Authors**

Authors must be registered as EUFAR website members

(Registration available following the link <https://www.eufar.net/accounts/register/>)

### **Excerpt**

About 160 characters recommended (brief summary; beginning of content by default)

### **Content**

Max 300-400 words for News / 2000 words for Airborne Research Story recommended (tables, links and pictures can be included)

### **Entry picture**

Resolution 400 x 225pixels recommended

### **Photo / video / document gallery**

Sequence of photos / videos / documents (to be provided as separate files)
